## THE YEAR IN RETROSPECT

The last decade has witnessed the successful implementation of two Five Year Plans. The First Plan of the State involved an expenditure of Rs 54.14 crore including Rs. 32.74 crore spent on the Centrally Sponsored schemes. As against this, during the Second Plan period Rs 103.10\* crore were spent on State Plan schemes in addition to Rs 8.78 crore spent on Centrally Sponsored schemes and Rs 13.72\* crore on the Rajasthan Canal Project which was outside State Plan ceiling during that period.

### *A DECADE OF PLANNED ECONOMY*

The outcome of these planned efforts has expressed itself in the development of all sectors of the State's economy. State income during the Second Plan period has increased by about 42% and thereby the per capita income has increased from Rs 262/- in 1955-56 to Rs 325/- in 1960-61 at current prices. Besides the introduction of the Panchayati Raj throughout the State in the year 1959 is an event of great significance. During this decade, the Jagirdari, Zamindari and Biswadari tenures have been abolished. The Rajasthan Tenancy Act 1955 which is one of the progressive tenancy acts in the country has provided for security of tenure and fixity of rent. The fragmentation of holdings has been statutorily prohibited and the scheme of consolidation of holdings is in progress. The irrigation facilities have been extended through construction of a number of major, medium and minor irrigation works. Rajasthan, which, till recently had been a regular deficit area has not only attained self-sufficiency in food grains but has also shown a sizeable surplus. The all commodities index of agricultural production (Base average of 1952-53 to 1955-56) for Rajasthan which was only 83.9 in 1952-53 has gone up to 126.7 in 1960-61. In years to come Rajasthan Canal will be the pride of the Nation with a gross commanded area of 80 lakh acres. By the end of Second Plan 160 Community Development Blocks

covering 74% of the rural population of the State were in existence and it is expected to cover the entire State by the end of October, 1963. Besides, 24% of the rural families were covered under co-operative fold by the end of 1960-61.

Rajasthan is rich in raw materials needed for industrial development and also abounds in mineral resources yet it is industrially backward for want of cheap power, means of communication and transport and trained man power. The installed capacity of power houses in the State has increased from 35 thousand KW at the end of First Plan to 109 thousand KW at the end of Second Plan. The road mileage also increased from 11371 in 1950-51 to 16744 in 1960-61, practically connecting all tehsil headquarters by road. During the Second Plan excepting textiles, the over all industrial production registered an increasing trend and with the announcement of various concessions by the State in the matters of land, water, power, sales tax and octroi a large number of industrialists are being attracted towards Rajasthan.

Spectacular progress has been achieved in the field of education. The literacy percentage has increased from 8.95 in 1951 to 15.21 in 1961. The percentages of school going children in the age groups 6-11, 11-14 and 14-17 were 44.3, 14.7 and 7.1 respectively by the end of 1960-61. The establishment of an engineering college, a medical college and 6\* polytechnics will go a long way in meeting the requirements of trained and qualified technical personnel. Rajasthan has already surpassed in the year 1959, the all-India averages for medical institutions and beds per million of population which were targetted to be achieved by the end of the year 1960-61.

### THIRD FIVE YEAR PLAN-OUTLAYS AND TARGETS

To accelerate this tempo of development with our eyes set on the National objective of achieving a self sustained economy, a comparatively bolder 'Third Five Year Plan' involving an outlay of Rs. 236 crore was finally approved for the State of Rajasthan. This allocation is more than double the amount of Rs. 105.27 crore allotted for the Second Plan and about 40% greater than the combined allocation of Rs. 169.77 crore fixed for the last two Plans of this State. The priorities in allocation laid down for the Second Plan were maintained in the Third Five Year Plan except for Co-operation & Community Development and Transport & Communications which have inter changed their positions. The details of the distribution of total outlay in the Third Five Year

---

\*Admissions to Polytechnic Bikaner to start from July, 1962

Plan in comparison to that of the Second Five Year Plan are given below —

H n d f D v o l o m e n t	S e c o n d P l a n		T h i r d P l a n	
	Outlay (Lakh Rs)	Percentage distribution	Outlay (Lakh Rs)	Percentage distribution
1	2	3	4	5
1 Agricultural Programmes	1123.18	10.67	2300.00	9.75
2 Co-operation & Community Development	828.00	7.87	2150.00	9.24
3 Irrigation & Power	456.49	4.31	12100.00	51.2
4 Industry & Mining	601.10	5.74	805.00	3.70
5 Transport & Communications	511.50	4.91	1320.00	5.50
6 Social Services	2391.90	22.72	4595.00	19.47
7 Miscellaneous	101.29	0.96	210.00	0.89
Total	10577.46	100.00	23800.00	100.00

The main tasks and targets under the Third Five Year Plan were to produce 16 lakh tons of additional food grains, to increase the area by 4.79 lakh acres under minor irrigation programmes and by 11.69 lakh acres under other irrigation schemes to consolidate 25 lakh acres of land, to cover the entire State by Community Development Blocks, to bring all villages and 67 per cent of the rural families within the co-operative fold to increase the installed capacity of State's power houses by 253 thousand KW, to increase mineral production, to provide educational facilities for 68.4 per cent of the children in the age-group of 6-11 and for 24 per cent of the children in the age group of 11-14, to establish one more University, to provide one medical institution (Allopathic or Ayurvedic) per unit of 7200 persons in the rural areas and 500 beds per million of population in the State, to cover all towns with a population of 10 thousand and above under urban water supply scheme to provide at least one source of clean drinking water for a unit of 400 persons in rural areas and to provide jobs to 8 lakh persons in the labour force

## RAJASTHAN 1961-62

### STATE & CENTRAL SHARE IN EX.

*PROGRESS DURING 1961-62***Allotment & Expenditure**

Of the total Plan allocation of Rs 236 crore, Rs 34 crore were provided for the execution of various development schemes during 1961-62, the first year of the Third Plan. Though this allotment is only 1/7th of the total Third Plan, yet in absolute terms it is higher even than the expenditure of Rs 32.15 crore during the last year of Second Plan and more than double the combined expenditure of 1st year of both the First and Second Plans. While the details of schemewise allotment are given in table 6, a glance at broad allotments reveals that the highest allocation of Rs 16.40 crore was earmarked for Irrigation & Power. Next in order were Social Services with Rs 7.45 crore, Agricultural programmes and Co-operation & Community Development with Rs 3.50 crore each, Transport and Communications with Rs 1.72 crore, Industry and Mining with Rs 1.15 crore and Miscellaneous group with Rs 0.28 crore. Thus the order of priorities for various sectors during 1961-62 was identical to that fixed for the Third Plan period.

During the year under review the total expenditure, pending reconciliation for some departments, amounted to Rs 33.81 crore or 99.5 percent of the total allotment. It may be mentioned here that this expenditure takes into account Rs 1.38 crore as Rajasthan's share of common works of Bhakra-Nangal project as estimated on the basis of fixed percentages of the total expenditure incurred by Punjab Government for works of common benefit. It also includes Rs 2.26 crore transferred during the year to Panchayat Samitis under various sectors, the transferred amount having been treated as expenditure.

During the year 1961-62, the highest expenditure of the order of 49 percent was incurred for Irrigation & Power. 22 percent for Social Services, 11 percent for Co-operation & Community Development, 8 percent for Agricultural programmes, 7 percent for Transport & Communications and about 3 percent for Industry & Mining and Miscellaneous group. Amongst the broad sectors the highest achievement was in the Transport & Communications sector where the expenditure exceeded the allotment by about 40 percent. Similarly, under Co-operation & Community Development, 7 percent more than the allotment for the year was spent. In case of Agricultural programmes and Industry & Mining there was sizeable shortfall in expenditure. The shortfall in expenditure in these as well as in a few other sectors has been mainly due to the shortage of construction materials like iron and steel, paucity of

technical personnel, time taken in the spade work for taking up new schemes for execution and the administrative bottle-necks. The Urban Community Development programme was altogether kept in abeyance. However, the overall progress of expenditure as compared to the provision for the year 1961-62 remained satisfactory, when the shortfall in certain sectors was made good by increased expenditure under other heads.

Turning to the details of expenditure under revenue, capital and loan accounts given in table 1 it will be observed that of the total expenditure of Rs. 33.81 crore, 25 percent was on revenue account, 54 percent on capital account and the rest 21 percent in the form of loans. Thus looking to the break up of original plan allocations for the year under these heads the excess of expenditure on capital account by about 9 percent largely covered the shortfalls in expenditure on revenue and loan accounts. Further, it will be observed as per details given in table 2 that 69 percent of the total expenditure incurred during the year was in the nature of direct expenditure, 21 percent was in the form of loans advanced through different agencies under various development programmes and 10 percent was provided as grants and subsidies which in turn required a matching expenditure on the part of the recipients.

The expenditure policy of the Government has multi-farious effects on the economy of the State which could be assessed by analysing the pattern of expenditure. For this purpose the expenditure can be reclassified between current expenditure, capital expenditure and expenditure relating to changes in financial assets. A glance at table 3 would reveal that Rs. 18.31 crore or about 54 percent of the total expenditure during the year under review was in the nature of direct capital formation in the economy through Government effort while the current expenditure and expenditure relating to changes in financial assets accounted for 24 percent and 22 percent respectively. As the financial investments in industrial and cooperative societies, loans given to Rajasthan State Electricity Board etc. represent the extent of diversion of funds to various sectors for augmenting their capital resources it may be safely assumed that in all 76 percent of the total expenditure was intended for capital formation only.

#### Financing of the Plan for 1961-62:

While making the allocations during the year it was anticipated that the Central Government would provide a sum of Rs. 22.50 crore by way of Central assistance against various plan schemes—Rs. 17.71 crore by way of loans and Rs. 4.79 crore as grants-in-aid. The balance of Rs. 11.50 crore was to be raised by the State Government through

measures of additional taxation, small savings, contribution from revenue account, contribution from capital account etc. The State Government strove hard during the year under review to achieve these targets. In matters of additional taxation recourse was taken to sales tax, passenger and goods tax, entertainment tax, stamp duties, state excise duties, etc. but the revenue from additional taxes fell short when Rs 123 crore only could be raised against the expectations of Rs 135 crore. There was also a shortfall on revenue account at 1960-61 level of taxation to the extent of Rs (-) 268 crore as against the expected increased contribution of Rs 210 crore. The contribution from capital account also showed a decline of Rs (-) 679 crore as against the envisaged contribution of Rs 435 crore. The share of small savings too did not reach the level of original estimates. As such besides Central assistance, other sources had to be resorted to as per details given in table 4 for financing the expenditure of Rs 3381 crore incurred during the year. Here it may also be mentioned that the central assistance for financing the State plan expenditure was mostly in the form of loans and constituted 81 per cent of the total receipts due while the grants and subsidies accounted for the rest, the sectorwise details of which are given in table 5.

Besides the State Plan schemes the Central Government spent Rs 077 crore on Centrally Sponsored schemes and as per reports available Rs 379 crore on various Central Plan schemes operating in the territory of Rajasthan. Thus in all Rs 3837 crore were spent in Rajasthan on development activities during 1961-62.

#### Principal Physical Achievements

The expenditure and investment in any economy reflect themselves in the form of creation of new assets, increased production and better social amenities put at the disposal of the community. The year under review marked the release of water from the Rajasthan Canal which was a step in the direction of bringing further prosperity to the State. Accordingly, during the year under review the State continued its onward march recording improvements in all sectors of its economy. In the Agriculture sector an additional production potential of 192 lakh tons of food grains, 046 lakh tons of oil seeds and 031 lakh bales of cotton has been created and 210 thousand acres of additional land was irrigated through various irrigation projects. Cooperative movement has been gaining strength and by the end of the year, 27.6 per cent of the total rural families in the State were brought under cooperative fold. Under Community Development programme 84 per cent of the rural population of the State was covered by the end of the year under review.

The industrial production recorded significant improvement over the level prevailing in the preceding year in almost all principal industries of the State. Also, though the installed capacity of State owned power houses has not increased significantly during the year yet consequent upon the execution of various development schemes the total number of localities electrified increased from 131 at the end of 1960-61 to 208 by the end of 1961-62. The total electricity generated increased from 126 million kwh in 1960 to 149 million kwh in 1961. Likewise the consumption of electricity also increased from 85 million kwh to 107 million kwh with a higher share for industrial sector. During the year 351 miles of new roads were constructed and 171 miles of old roads were repaired.

There has also been considerable enlargement of Social Services during 1961-62. The percentage of children in the age group 6-11 attending schools has gone up from 44.3 at the end of 1960-61 to 47.5 at the end of 1961-62. In the age groups 11-14 and 14-17 the corresponding percentages increased from 14.7 to 17.8 and from 7.1 to 7.4 respectively. During this period 2 engineering colleges and 5 polytechnics continued to function. In the final examinations of 1961-62, 269 candidates in degree courses and 210 candidates in diploma courses were declared successful. On the side of Health 16 new dispensaries, 4 primary health centres, 1 dental clinic and 29 family planning centres were opened and 172 beds were added, besides executing large scale programmes of controlling malaria and tuberculosis. 95 Ayurvedic dispensaries were also newly opened.

### Buildings Programme

The direct capital expenditure was incurred on the construction of buildings, roads, water works, irrigation and power projects etc. on the one hand and on the purchase of machinery and equipment on the other. Under Irrigation, Power, Water-supply and Forest sectors all construction works are executed departmentally. In case of other sectors like Agriculture, Animal Husbandry, Industries, Education, Health, Industrial Housing, Labour, Welfare of backward classes, Tourism Mandals etc. the civil construction works are executed by the Public Works Department, which had an allotment of Rs. 297 crore for the year 1961-62 of which about 95 percent was actually spent by the end of the year as per details given in table 10. With this expenditure various construction works were completed while work was in progress at others at the end of the year under review. Under Agriculture sector the construction of 58 seed stores, 9 sheds for implements, 8 laboratory buildings at various places and

a hostel building for the Rajasthan College of Agriculture, Udaipur were completed while the work on the Chemistry Laboratory annexed to the said college remained in progress. The veterinary hospital at Chittorgarh and hostel building with a dining hall attached to College of Veterinary and Animal Science, Bikaner were completed under Animal Husbandry sector. The construction work was continued on 14 Industrial estates initiated during Second Plan and by the end of 1961-62 in all 233 sheds were completed, 77 sheds were nearing completion and 55 sheds were at different stages of construction. The construction of buildings for the Sodium-sulphate plant at Deedwana was also in progress. During the year, 512 tenements under Industrial Housing scheme carried over from Second Plan were completed and work on 1042 tenements was continued. Under Education sector extension and new works for various educational institutions i.e. a block for M B M Engineering College, building for Raj mahal Girls' Degree College and NCC Quarters for S M K College located at Jodhpur, and the laboratory and hostel buildings for Government College, Ajmer were completed during the year under review. The construction of a hospital building at Jodhpur, 15 residential quarters and 19 primary health centre buildings at different places were completed under Health sector. Labour welfare centre buildings at Ajmer, Gangra nagar and Kota were constructed while the construction on industrial training institutes at Bikaner, Jodhpur, Pali and Udaipur were reported to be going on. Under Tourism sector construction of 2 rest houses one each at Ajmer and Pushkar and the Soral at Ajmer was completed. Besides, construction of godowns by co-operative societies and houses under Low Income Group Housing, Middle Income Group Housing and Rural Housing was also promoted through loans.

### Training Programme

The implementation of various development programmes under Agriculture, Animal Husbandry, Forests, Irrigation, Power, Transport and Communications, Industries, Social Services etc. have also created larger opportunities for technical training. During the year 1961-62 a sum of Rs 175.58 lakhs was provided for training programmes against which an expenditure of Rs 144.91 lakhs was incurred. With this expenditure not only the training institutions started upto the end of Second Plan were maintained but in some cases the intake capacity was enhanced and a few more institutions were newly opened. In Agriculture sector the intake capacity of S K N College of Agriculture, Jodhpur was increased from 80 to 100 students a year.

Though the proposed Agriculture University at Udaipur could not be established during the year yet post graduate education was continued at Rajasthan College of Agriculture, Udaipur. The 5 gram sevak training centres at Deoli, Kota, Mandore, Sawai Madhopur and Udaipur were continued. The College of Veterinary and Animal Science at Bikaner had an intake capacity of 60 per year from where 54 Assistant Surgeons qualified during the year. 25 diploma holders and 15 degree-holders also attended the refresher course at Sheep and Wool Training School Jodhpur. To revitalise co-operation sector through trained personnel the combined intake capacity of the junior officers' training schools located at Bharatpur, Jaipur and Jodhpur was increased from 400 to 600 per year. Training of non officials was carried on through the agency of Rajasthan State Co-operative Union. These training facilities were further being reinforced by getting the officers trained at the various co-operative training schools run in the country under the auspices of the Reserve Bank of India. Under Forest sector 30 Foresters and 90 Forest guards qualified from the Foresters' Training School Alwar and Forest Guards School, Banswara respectively. Besides, 5 Rangers and 3 officers of Forest Department and 2 Rangers in Soil conservation completed their training at Dehradun. 5 Panchayat Samiti Adhyayan Kendras were functioning in the State at Bikaner, Dabok (Udaipur), Jaipur, Jodhpur and Kota and during the year 2686 Panchayat Samiti members, 1372 Nyaya Panchayat members and 374 Panchayat secretaries were trained.

In the field of Industry, 5 cluster type training centres with an intake capacity of 60 each were opened during the year at Kethun (Kota), Lalgarh (Bikaner), Mandore (Jodhpur), Nathdwara (Udaipur), and Sanganeer (Jaipur) to impart training in leather, carpentry, black smithy, etc and in all 104 candidates were admitted. 40 candidates were undergoing training at Leather Works Training Institute, Jaipur. Also the industrial training centres opened during Second Plan at Ajmer, Bikaner, Jaipur, Jodhpur, Kota and Udaipur were continued.

Under Social Services the training facilities for teaching staff were augmented. Under Technical education, during Third Plan, 75 seats will be added to the intake capacity of MBM Engineering College, Jodhpur. The number of candidates who qualified from this college during 1961-62 was 51 in Civil engineering, 21 in Mechanical engineering, 11 in Electrical engineering and 27 in Mining engineering. Of the 6 polytechnics initiated during Second Plan 5 were already functioning at the end of 1960-61 while the one at Bikaner will start functioning

from next year. In order to overcome the shortage of doctors one more medical college at Udaipur besides the 2 already functioning at Bikaner and Jaipur was started during the year with an intake capacity of 40 students. The training of dais, nurses, compounders, auxiliary health workers and lady health visitors was continued. 2 Government Ayurvedic Colleges at Jaipur and Udaipur also continued to function. Under Labour sector 1 Labour Officer and 1 Labour Inspector were sent to Calcutta for Diploma course in Social Welfare. 3 Employment Exchange Officers were trained in employment process at Bhopal and 2 officers were sent to the Directorate of Employment and Training, Government of India, Delhi.

62 Progress assistants and 32 Statistical inspectors were trained in statistical methodology and survey work in the Directorate of Economics and Statistics, Rajasthan during the year. The candidates directly recruited for the RAS and RAeS continued to receive training in the Officers Training School, Jodhpur. Similarly Training School at Kishangarh continued to impart training to police personnel.

### Employment

The implementation of various development programmes and allied social activities contribute significantly to increase employment opportunities in various fields in the State. The total job requirements for the Third Plan quinquennium were estimated at 8 lakh persons. Against this demand, the schemes in the Third Plan were estimated to provide direct employment to 4 lakh persons—3.20 lakh under State Plan, 0.11 lakh under Central schemes executed in the territory of Rajasthan and 0.69 were expected to be filled up by the private sector. The total indirect employment was estimated at 4 lakh persons. Although it is difficult to give an exact quantitative assessment of the total employment generated during the year yet the construction work going on at Rajasthan Canal, Chambal Project and other major minor and medium irrigation projects, roads and building schemes, as well as increased social services and allied activities to enumerate a few have definitely resulted in opening up of larger avenues of employment. During the year 1961 the number of registrations in the 18 Employment Exchanges functioning in the State was 1.24 lakhs or about 7 percent more than what it was during the previous year. These exchanges during the year notified in all 27648 vacancies and placed 19747 persons in jobs.

During the year 1961, employment in the public sector in the State, based on the returns collected under Employment Market Information Scheme, was also on an increase. Though the reporting establishments have also increased yet the available data may broadly be taken as indicator of the employment situation in the public sector. Accordingly the number of employees in the public sector have increased from 3.19 lakhs at the end of 1960 to 3.44 lakhs at the end of 1961 about 88 per cent of the increase being under 'Service criterion only'. The number of Central Government employees increased by 2 thousand, State Government employees by 11 thousand, Ours Government employees by 2 thousand and local bodies employees by 10 thousand.

The data of registration and placements and the employment in the public sector are indicators of the extent of employment opportunities in the urban areas but no such data at present is available for rural areas. However, according to the estimates worked out by the Directorate of Economics and Statistics Rajasthan the additional direct employment during the year 1961-62 was of the order of 80 thousand of which continuing employment constituted 34 thousand—16 thousand under plan schemes and 18 thousand under non plan schemes, construction employment 44 thousand and Central Plan schemes 2 thousand. The indirect employment outside agriculture was estimated to be 44 thousand and that in agriculture 25 thousand. Thus the total additional employment provided during the year 1961-62 has been estimated to be 149 thousand or about 18.6 per cent of the total employment to be provided during Third Plan period.

## SECTORWISE REVIEW

The Indian economy during the year 1961-62 revealed mixed trends of sustained progress and stresses and strains of a developing economy. While there was a marked improvement in the national income, industrial output and the balance of payments position the agricultural production did not come up to the record level reached during the previous year. There was a slight rise in the price level more at the retail than at the wholesale when the All India Wholesale Price Index Number (with 1952-53 as base) recorded a nominal increase of 0.2 point from 124.9 in 1960-61 to 125.1 in 1961-62 and the All India Consumer Price Index Number (with 1949 as base), which shows retail price movements increased by 3 points from 124 in 1960-61 to 127 in 1961-62.

In Rajasthan the food situation remained quite satisfactory during the year under review. Helped by favourable climatic conditions and implementation of various development schemes the agricultural production not only maintained the increasing trend it also recorded a significant increase over the preceding year's level, when the Index of Agricultural production (with the average of 1952-53 to 1955-56 as base) prepared by the Directorate of Economics and Statistics, Rajasthan recorded an increase from 126.7 in 1960-61 to 140.8 in 1961-62 as per details given in table 34. The index of food-crops was the highest (139.7) so far recorded.

In the field of industrial activity as well, the rising trend in the production recorded during the preceding year was maintained during the current year. A glance at table 26 would reveal that the production in almost all the major industries in the State i.e., textiles, cement, sugar, glass, ball bearings, electric meters etc. have recorded a significant improvement over the level registered in the preceding year. Consequently, the consumption of coal and electricity in the State also recorded substantial increase during the year under report. The consumption of electricity increased from 85.37 million kwh in 1960 to 106.96 million kwh in 1961 with a higher share for industrial sector and the consumption of coal rose from 6.57 lakh tons to 8.04 lakh tons during the same period. The mineral production in the State maintained a steady increasing trend.

# SELECTED ECONOMIC INDICATORS

Rs. in crore STATE INCOME (AT CURRENT PRICES)

## AGRICULTURAL PRODUCTION

Index No.

(BASE AVERAGE OF 1952-53 TO 1955-56)

## INDEX NUMBERS

Index No.

Gen. Index of Wholesale Prices  
(Base. 1952-53)

COST OF LIVING INDEX

Despite an increase in the agricultural and industrial production the price situation in Rajasthan continued to be disquieting which can be ascribed to proportionately greater increase in demand brought about by factors like increase in population developmental expenditure etc. As in the National economy so in the State, the signs of stresses and strains were more visible at the retail than at the wholesale level, when the Average General Index Number of wholesale prices in Rajasthan (with 1952-53 as base) moved up by 1 point from 124 to 125 during the said period while the Consumer Price Index Numbers (Retail price) for Jaipur and Ajmer centres recorded larger increase. The average Consumer Price Index Number for working classes for Ajmer centre (with 1949 as base) shot up from 109 in 1960-61 to 114 in 1961-62 and that for Jaipur centre (with 1955-56 as base) from 128 in 1960-61 to 135 in 1961-62.

It is in this context of the economic situation prevailing in India in general and Rajasthan in particular that the achievements of the plan need to be weighed. While the details of physical targets and achievements under individual schemes are given in table 7 a brief resume of the important achievements recorded during the year 1961-62 is given below —

### *I AGRICULTURAL PROGRAMMES*

#### *Agricultural Production*

In the Third Plan agricultural production programmes are intended to provide adequate food to support the increasing population, the required raw materials for a growing industrial economy and to make available larger exportable surpluses of agricultural commodities. Broadly it is aimed to create additional production potential of 16 lakh tons of food grains, 1.10 lakh tons of oil seeds, 1.52 lakh bales of cotton and 0.90 lakh tons of sugarcane (Gur). These targets are proposed to be achieved both through the extensive and intensive methods.

During the year 1961-62, in order to popularise and increase the supply of improved seeds to the cultivators, a new farm of 100 acres at Shahbad started functioning and land acquisition proceedings etc. were in progress for 2 such farms proposed at Aklera and Bairath in addition to the already existing 38 seed multiplication farms. 5.83 lakh mds of improved seeds were distributed through 174 seed stores and an additional area of 16.16 lakh acres was covered. About 17 thousand tons of chemical fertilisers were distributed to the cultivators. Conservation and development of local mineral resources were encouraged. The green manuring was extended further in 1.19 lakh acres. The production of improved implements was augmented through advancing

loans amounting to Rs 0.29 lakh to small fabricators as well as by strengthening the workshop at Jaipur 55000 Such implements were introduced in the field and Rs 1.00 lakh were advanced to cultivators for purchase of improved implements Demonstrations on the cultivators' holdings for switch over to improved agricultural practices were being constantly held and an area of 0.99 lakh acres was brought under it Plant protection measures for prevention of damage to crops from pests and other diseases were also carried out in 15.19 lakh acres The 1600 acre mechanised farm at Umedganj (Kota) was further strengthened

An intensive programme of agricultural development known as 'Package programme' was in operation in the Pali district of the State since November, 1960 During 1961-62 Rs 12.07 lakhs were spent against the provision of Rs 16.00 lakhs The number of blocks under the programme increased from 7 to 10 883 farm plans were prepared and Rs 3.69 lakhs were loaned to cultivators 100 new wells were sunk, 200 wells were deepened, 4 village tanks were constructed, 20 pumping sets and 50 Persian wheels were installed as planned and 1790 tons of chemical fertilisers were distributed surpassing thereby the targets of the year

In order to accelerate the supply of raw materials needed for industries based on agricultural products and to ensure a balanced development of food and commercial crops, the quality and per acre yield were augmented through measures like supply of improved seeds, chemical fertilisers improved implements adoption of improved agricultural practices etc As a result of this integrated programme an additional production potential of 0.46 lakh tons of oilseeds and 0.31 lakh bales of cotton is likely to have been created as per details given in tables 15 and 16 respectively.

Under the horticulture programmes, which will go a long way to improve the nutritional standards of the diet, loans amounting to Rs 3.50 lakhs were given to cultivators for plantation of new orchards, 7 nurseries were established one each at Ajmer, Alwar, Banswara, Bharatpur, Bundi, Jhalawar and Sawai Madhopur, a progeny orchard was being established at Kota and 22 candidates were trained in gardening

Agricultural research and education were being steadily promoted and coverage of agro economic research, statistics and land-use planning was being expanded to facilitate analytical studies on various agricultural complexes During the year, the laboratories and the sub-stations for

# INDEX NUMBERS OF AGRICULTURAL PRODUCTION

( BASE: AVERAGE OF 1951-53 TO 1955-56 )

chemistry, pathology, botany and entomology started during the Second Plan, were maintained. The organisation meant for the dissemination of agricultural information to the agriculturists was also strengthened during the year. For more efficient implementation of the various agricultural production programmes the agricultural administration was further strengthened during the year through establishing a planning cell at the State headquarters and appointing 3 more District Agriculture Officers in the field.

Land development measures were taken up for increasing the land under crops and for extending double cropping. Accordingly, marginal lands aggregating to 0.64 lakh acres were reclaimed. 4.28 lakh acres of land was brought under 'Medhi Bundi' and double cropping was introduced on 3.00 lakh acres. This expansion of agriculture is estimated to have contributed an increased food production of 71.84 thousand tons. To reduce the fragmentation of holdings consolidation operations were continued in 20 tehsils of 8 districts and in all 7.42 lakh acres of land was consolidated in 513 villages.

The impact of all these improved inputs in agriculture is manifested in the gradual harnessing of the agricultural potential of the State. During the year 1961-62, an additional production potential of 1.92 lakh tons of foodgrains, 0.46 lakh tons of oil seeds and 0.31 lakh bales of cotton was envisaged. The position of acreage and production under different crops for the year 1961-62 as compared to the preceding year is given in table 13. The Index of Agricultural Production as worked out by the Directorate of Economics and Statistics (with the Average of four years i.e. 1952-53 to 1955-56 as base) witnessed an increasing trend during the year under review. The all commodities index which was 126.7 in 1960-61 went up to 140.8 in 1961-62 as shown in table 34. The index of food production which showed fluctuations during Second Plan period and a declining trend after the peak level of 131.2 in 1958-59 shot up to 139.7 during this year. No doubt the index of non food crops has gone down in comparison to the year 1960-61 but is still above the peak level maintained at the beginning of the Second Plan. This decline is mainly due to the partial failure of sugarcane crop during the year under review.

#### Minor Irrigation

Irrigation is one of the basic requirements for increasing agricultural production in the State. Minor irrigation ensures the dispersal of irrigation benefits over different regions. These are labour intensive and

are economical to construct and maintain. The Third Plan therefore, continues to assign greater importance to these programmes through which it aims to create an additional irrigation potential of 4.79 lakh acres. The Irrigation Department continued the construction of 117 flow works including 24 new works sanctioned during the year under review of which only 6 were completed by the end of the year. Besides, Rs 25.00 lakhs were placed at the disposal of Panchayat Samitis by the Irrigation Department for the construction and maintenance of works costing less than Rs 25,000/-. Funds amounting to Rs 29.00 lakhs were also placed at the disposal of Panchayat Samitis by the Agriculture Department for taking up other minor irrigation works. During the year under review 1133 new wells were constructed, 233 diesel engines and 100 electric motors were supplied, 200 persian wheels were installed and 80 village tanks were either newly constructed or renovated.

Loans amounting to Rs 12.32 lakhs were also advanced by the Agriculture Department to the Rajasthan Under ground Water Board which is entrusted with the task of striking water in rocky areas and for constructing private and State tubewells. Besides these agencies, minor irrigation facilities were also developed under the Community Development programme.

### Soil Conservation

The Thar Desert which is progressing towards East is a real menace and to arrest this expansion as well as to avoid any further loss to the fertility of soil due to wind water and deforestation, 11.5 lakh acres of land shall be covered by soil conservation measures during Third Plan period. During the year 1961-62, 2 dry farming demonstration centres at Ajmer and Jodhpur and the Junior Staff Training Institute, Jodhpur continued to function and land use survey covering 4.27 lakh acres in Rajasthan Canal command area was newly taken up. Dry farming was introduced in 2000 acres and 19,000 acres of land was contour bunded. About 5250 acres of land was also covered under other soil conservation measures in desert hilly and ravine areas of the State and shelter belts through plantation along 20 miles roads were created.

Under Central Plan schemes the Central Arid Zone Research Institute at Jodhpur continued to conduct coordinated land research and regional survey for the efficient utilisation of physical livestock and human resources of the desert area. Schemes like research in pasture development, soil conservation in catchment areas in river valley projects and dry

farming demonstration projects were also operating as Centrally Sponsored schemes

### Animal Husbandry

A high priority has been assigned to Animal Husbandry activities in Third Plan and attention is being paid towards improving the breed of the cattle and developing feed and fodder facilities for them. More rampant diseases are being gradually controlled. The training institutions are being increased and education and research in veterinary science are being promoted.

During the year 1961-62 for improving the breed of cattle, one semen collection centre was established at Ajmer and 3 key village blocks at Alwar, Kekri and Nagaur were developed. 6 New Goshalas were newly aided besides continuing aid to 22 Goshalas and 4 Gosadans. 5890 Useless and scrub bulls were castrated. A bull rearing farm was opened at Nohar. Breeding stock was purchased from Gujarat State for the newly opened breeding farm of 'Gir breed' at Ramsar (Ajmer). To create public enthusiasm for quality cattle, 5 cattle shows were organised during the year in important breeding tracts. For developing feed and fodder resources 2 pasture demonstration farms at Bhinai (Ajmer) and Lachhmangarh (Sikar) and for producing improved grass seeds 1 seed multiplication farm at Dudu (Jaipur) were opened. The camel breeding farm at Bikaner and 5 camel key village units established during Second Plan, were maintained. For developing sheep and wool industry in the State of which she is the premier producer the Sheep Research station, Bikaner was strengthened and 113 sheep and wool extension centres were continued. Cross-breeding of indigenous sheep for improving the yield of wool was promoted. During the year 1961-62 the Poultry Extension Centre, Jodhpur was converted into a distinct farm and 11 other poultry extension farms and 3 State poultry farms continued to supply birds and eggs for hatching purposes.

During the year, under the rinderpest eradication programme, 21.36 lakh vaccinations were performed bringing the cumulative total of cattle heads vaccinated to 49.46 lakhs. A radiological unit for proper diagnosis of diseases was established at Jaipur. The biological unit established during the Second Plan started functioning during the year under review. By the end of 1961-62 there were 127 hospitals and 143 dispensaries as against 107 and 148 respectively at the end of 1960-61.

### Dairying and milk Supply

During 1961-62, 1 ghee grading station was opened at Bikaner besides 2 already functioning at Alwar and Jaipur. The survey of milk pockets was completed in and around Bikaner city for estimating the quantity of milk available for being supplied to Delhi under Delhi Milk Supply Scheme. As the equipment could not be purchased for foreign exchange difficulty much headway could not be made in the Jaipur Milk Supply Scheme initiated during the Second Plan.

### Forests

For the development of forest resources of the State during Third Plan it is proposed to increase the forest area by planting trees over 20 000 acres of village land, 41500 acres of plantations of special economic importance and 1600 acres of irrigated firewood plantations. During the year under review in order to prevent haphazard exploitation, systematic working plans were prepared for Banswara, Baran, Bundi, Chittorgarh, Jhalawar and Kota forest divisions while the work was in progress in Sirohi, Tonk and Udaipur divisions. Demarcation and settlement of area was done in 1190 sq miles. In order to exploit and approach the interior of forests 94 miles of fair weather roads were newly constructed. The target fixed for the year for creating economic plantations over an area of 5000 acres was fully achieved. A nursery was started in Rajasthan Canal area at Masitanwalli. The plantations were also raised along the road sides and railway lines for 46.5 miles against the target of 40 miles. The 7 game sanctuaries were maintained and a National park is being developed at Udaipur. The zoos at Jaipur and Jodhpur were also improved.

### Fisheries

Rajasthan has a large number of lakes and tanks and provides good scope for the development of fishery industry. During 1961-62, 7624 acres of culturable water area was surveyed in the State and 25.80 lakh fingerlings were stocked in various waters for their propagation. 179 Tanks were licenced. 75 New tanks were added this year to the already listed 250 tanks for auction. 23 Seed collection centres were established and a fish farm at Bhilwara was started. 45 Panchayat Samitis were selected for the development of fisheries work and they were technically guided at appropriate levels.

### Ware housing, Marketing and Storage

To develop the storage and marketing facilities the Rajasthan State Warehousing Corporation was established in December, 1957 and the

State Government is contributing to its share capital. The scheme of agricultural marketing initiated during Second Plan would get further momentum after the enforcement of the Agricultural Marketing Act which is likely to come up shortly.

## II CO-OPERATION & COMMUNITY DEVELOPMENT

### Co-operation

Economic development along democratic lines offers a vast field in the application of co-operation in its varying forms. During the year under review, 1000 service co-operatives were organised, 647 societies were revitalised and 100 co-operative marketing societies were started. 5 Land mortgage banks at Banswara, Hanumangarh, Jodhpur, Jhunjhunu and Nohar were established and 10 central co-operative banks at Bandikui, Bayana, Deeg, Kherthal, Makrana, Pipar city, Rampur, Rani, Sambhar and Srimadhapur were opened. The share capital was contributed in respect of 5 primary marketing societies. 41 rural godowns and 5 godowns for primary marketing societies were at various stages of construction by the end of the year under review. 10 new primary stores were also organised. The target of organising 30 co-operative farming societies was fully achieved. The number of agricultural credit societies in the State had increased to 11527 of which 5648 were service co-operatives.

According to the latest information available during the year ending June, 1961, the credit societies advanced loans amounting to Rs 2039.82 lakhs and recoveries amounting to Rs 1482.27 lakhs were affected. The share capital and working capital of the then functioning 18309 societies were Rs 620.48 lakhs and Rs 3250.86 lakhs respectively.

As a result of various plan activities there was a significant increase in the number and membership of co-operative societies. By the end of March, 1962 the number of co-operative societies had increased to 19478 and the membership to 10.21 lakhs raising thereby the coverage of rural families under co-operative fold to 28 percent of the total rural families in the State from 24 per cent at the end of Second Plan.

### Community Development

The Second Plan laid greater emphasis on the Community Development programme which aims at rapid economic and social advancement through community efforts. By the end of 1960-61, 66 per cent of the rural area and 74 per cent of the rural population of the State was covered under this programme and it is proposed to cover the entire

rural area and rural population by October, 1963. During the year under review, 22 shadow blocks were converted into pre-extension blocks, 32 pre-extension blocks into I stage blocks and 25 I stage blocks into II stage blocks and thus by the end of March 1962 there were 23 pre-extension blocks, 79 I stage blocks, 79 II stage blocks and 1 multipurpose tribal welfare block covering in all 75 percent of the rural area and 84 percent of the rural population. The efforts to enlist more and more co-operation of local people in the preparation of village production plans and various development schemes in the field of Agriculture extension, Animal Husbandry, Co-operation, Irrigation, Health and Rural sanitation, Education, Communication, Industries, Housing, Rural Arts and Crafts etc were continued as per details given in table 6. The people's participation during the year in the form of cash, labour and material aggregated to Rs 117.24 lakhs which works out to nearly 51 percent of the Government expenditure on this sector as against the ratio of 44 percent during the Second Plan period. Thus the people's response to the programme has been quite encouraging during the year under report.

### **Panchayati Raj**

Panchayati Raj was introduced throughout the State in the year 1959 with a three tier set up viz Panchayat at the village level, Panchayat Samiti at the block level and Zila Parishad at the district level. At the end of the year 1961-62 there were 7395 Panchayats, 232 Panchayat Samitis and 26 Zila Parishads functioning in the State. A number of development schemes have been entrusted to these local institutions for their implementation at village level with the help of extension agency working at the Panchayat Samiti level and under the guidance of district level officers at the Zila Parishad level. During the year 1961-62 under various sectors Rs 948.89 lakhs were provided in the budget both for plan and non-plan schemes out of which Rs 822.86 lakhs or 87 percent were spent. Although imposition of taxes was voluntary yet more and more Panchayat Samitis came forward to levy taxes. During 1961-62 out of the total of 232 Panchayat Samitis 157 had levied taxes yielding an annual revenue of Rs 37.89 lakhs. To create right type of leadership, 5 Adhyayan Kendras of the Second Plan were continued and 3 more such Kendras were started which serve as study centres for the members of the Panchayat Samitis. During the year 4058 members and 374 secretaries of various institutions received training at these centres.

### III IRRIGATION & POWER

#### Irrigation

During the last decade irrigation facilities have been extended through construction of a number of major, medium and minor irrigation works. By the close of the Second Plan period Bhakra and Chambal multipurpose projects had also started supplying irrigation water. With an allotment of Rs. 85.10 crore the Third Plan envisages the completion of irrigation works of Chambal and Bhakra multipurpose projects as well as projects which were started during the last two plan periods and the repairing and improving the old existing works capable of being put to increased irrigational use. The expenditure on individual works and area irrigated during the year under review are given in table 22 and important physical achievements are narrated below.

**Bhakra Nangal Project**—This project is being executed jointly with the Government of Punjab. The work on all the 890 miles length of channels in Rajasthan, constructed for carrying water to the fields, was completed during Second Plan period except the work of remodelling of some outlets and a few minor buildings. The irrigation water from this project first started flowing in the year 1954 and an area of 298.81 thousand acres was irrigated. The supply of irrigation water at full capacity depends upon the supply made available from Bhakra Dam which would be possible on its completion at the end of 1964-65, when it would irrigate an area of 5.7 lakh acres and command 9.2 lakh acres of habitable land in Rajasthan.

**Chambal Project**—The work on this project was started during the year 1953-54 and both cost and benefits are shared with the Government of Madhya Pradesh. The project will be completed in three stages viz., (i) Gandhisagar project, (ii) Rana Pratap Sagar project and (iii) Kota dam project. Most of the work of the first stage i.e., the Kota barrage, the Gandhisagar dam, the Right main canal and the Left main canal, were completed by the end of the Second Plan and the remaining work was completed during the year under review as per details given in table 23. The irrigation was started from this project in November, 1960 and an area of 37.18 thousand acres was irrigated during 1960-61 while in 1961-62 the total land irrigated through this project was 64.62 thousand acres.

**Rajasthan Canal Project**—The Rajasthan Canal from Harike (Punjab) to Ramgarh (Jaisalmer District) on completion will be 425 miles long and will irrigate 36.3 lakh acres out of the net culturable commanded

area of 67.4 lakh acres. The gross commanded area under this project will be 80 lakh acres. The project is to be constructed in two stages. The first stage covers the construction of 134.0 miles long Rajasthan Feeder and 121.8 miles of the main Rajasthan Canal with all its branches and distributaries up to Naushehra branch. The second stage envisages the completion of the remaining canal (from mile 121.8 to 291.8) to its tail in North-West of Jaisalmer with its distributary system below Naushehra branch. During the year under review, 1845 lakh cft of excavation work, 3439 lakh cft of earth work, 675 lakh cft of compaction and 2.10 lakh rft of lining was done on the 1st stage works as per details given in table 24. The most significant achievement in the field of irrigation during the year 1961-62 was the opening of the Rajasthan Feeder below mile 103.8. The release of water from the Rajasthan Canal was inaugurated by the Vice President of India on 11th October, 1961 and the water was let into Naurangdesar distributary.

Rajasthan Canal will depend on the waters of the rivers Beas and Ravi. For ensuring perennial supply Pong-Dam on the Beas is being constructed by the Government of Punjab under the aegis of Beas Control Board. The work on the project was started in 1960-61 and it is expected that the project would be completed in about 8 years. Hydel power will also be generated from this dam which will have an installed capacity of 250 thousand KW. For the Third Five Year Plan period a sum of Rs. 25 crore has been kept in the State Plan of which Rs. 2.44 crore was spent during 1961-62.

Besides the continuing schemes, 8 new irrigation schemes were initiated during the year under review of which estimates for Gopalpura (Kota), Manpura (Jhalawar) and Jetpura (Bhilwara) were under consideration of the Planning Commission, Sarankheri and Wagli schemes were under scrutiny and the preparatory survey work was in progress in respect of Sabi, Khod and Ratylias schemes at the end of the year. The Basundhari project could not be taken up and later on Ratylias project was dropped. During the year, besides irrigation through multipurpose projects narrated above, 85.68 thousand acres of land was irrigated through major and medium works and 45.37 thousand acres through scarcity area works.

### Flood Control

The devastations affected by the 1957 floods in the North East region of the State emphasised the urgency of taking up flood control

measures and since then detailed programme of flood control works was being prepared. The progress during the year remained slow due to non-execution of the Kaman Pahari Drainage scheme, the estimates for which were under approval of the Planning Commission. However, a sum of Rs. 2.58 lakhs was spent on other flood control works including those for the river Ghaggar.

### Power

As our National economy is progressing towards take off stage the need for power development is becoming more pressing. Consequently greater stress has been laid on power in the Third Five Year Plan and it is envisaged to fully utilise the limited hydel power resources in the State and to develop thermal power in regions where hydel resources are not available or where it is not possible to transmit hydel power from other regions. It is expected that by the end of 1965-66 the installed capacity will increase by 253 thousand kW and 703 additional localities will be electrified.

During 1961-62 the work on Ratangarh and Bikaner Grid substations was continued and about 95 percent of the work was completed by the end of the year and it was expected that by June, 1962 these stations would be energised. Also with the erection of 251 circuit miles of 132 KV lines, 427 circuit miles of 33 kV lines and 196 circuit miles of 11 KV lines during the year under review, the mileage of transmission and sub-transmission system of various voltage lines stood at 453 circuit miles of 132 KV, 145 circuit miles of 66 kV, 915 circuit miles of 33 kV and 448 circuit miles of 11 KV by the end of the year under review. The power houses located at Nathdwara, Pali and Pratapgarh were acquired by the Rajasthan State Electricity Board during the year and negotiations for taking over of Udaipur and Ladnu power houses were under-way. With the execution of various development schemes the total number of localities electrified increased from 131 in 1960-61 to 208 by the end of 1961-62 and consequently during the same period the number of consumers also went up from 84 thousand to about 1 lakh. The total electricity generated and purchased in 1961 was 18.51 percent higher in comparison to 1960. Likewise the percentage of electricity sold to the total electricity generated and purchased increased significantly from 68 percent in 1960 to 72 percent in 1961 as shown in table 25. Also in order to increase power consumption through fullest public participation and use of local resources it has been planned that localities

not covered by the electrification programme of hydel scheme may also have the electricity provided the local people collect from amongst themselves 75 percent of the cost of the scheme and place it at the disposal of the Rajasthan State Electricity Board in the form of loan payable in 5 years. The balance of 25 percent of the cost shall be met by the Board itself.

#### IV INDUSTRY & MINING

##### *Large & Medium Industries*

Rajasthan offers a vast field for industrial expansion. During the last few years much has been done to improve the means of communication supply of raw materials power facilities and much needed trained personnel. Though industrialisation in the modern sense is of recent origin in Rajasthan yet 51 new industrial concerns have been granted licences under the Industries (Development and Regulation) Act 1951 and some existing industrial undertakings have been granted expansion licences for manufacturing new articles or for increasing their installed capacity. The Third Plan provides for the development of potential industrial areas in 7 districts which would be like industrial estates except that the sheds will have to be constructed by the entrepreneur himself. A pilot plant for recovery of sodium sulphate out of brine at Deedwana is also to be established. In the Public Sector the Government of India have also decided to set up a Precision Instruments factory at Kota and a Copper Smelter at Khetri while in the private sector a fertilizer factory at Hanumangarh and a Zinc Smelter plant at Udaipur are to be established. The Government will also provide facilities of adequate power at reasonable rates prompt allotment of land and relief in payment of sales tax and octroi duties to the private industrialists who desire to help the industrialisation of this State.

During the year under review 3 industrial areas viz Jhotwara (Jaipur) Industrial Estate (Kota) and Massuria Colony (Jodhpur) were being developed. The preliminaries of the pilot plant for recovery of sodium sulphate were completed by the end of 1960-61 and during the year under review while the building for the project was nearing completion the machines were under shipment.

The number of factories registered under section 2 (m) of the Industries Act 1948 increased from 573 at the end of 1960 to 648 at the end of 1961. The production in case of important large scale industries

# INDUSTRIAL PRODUCTION

## GROWTH OF FACTORIES

## RELATIVE NUMBERS

Sugar-1954-55=100

◀ BASE ▶

Other-1955=100

In the State viz textiles, cement, sugar, glass, ball bearings and electric meters have increased by 20 percent, 13 percent, 49 percent, 17 percent and 33 percent respectively over the preceding year as shown in table 26. For further expansion of the large and medium industries licences were issued for 38 new establishments by the Government of India under Industries (Development and Regulation) Act, 1951 for manufacturing woollen, worsted yarn, cotton textile engineering goods and chemicals. In addition, 6 licences were also granted to existing concerns for expanding their manufacturing units.

#### **Village and Small Industries**

Village and small industries are most fitted in the present economy of Rajasthan. The Government also encouraged them by giving various types of facilities such as grants, training supply of improved tools and equipments on easy terms and establishment of sales depots. While, these facilities are to be expanded and intensified during the Third Five Year Plan it has been envisaged to decentralise these industries through carrying them to rural areas and to bring more and more artisans under co-operative fold.

Under handloom development programmes, during the year under review, 2 housing colonies for weavers at Kishangarh and Pisangan were completed, 336 weavers were supplied with improved looms and accessories, loans worth Rs 0.38 lakhs were given to weavers for providing fixed and working capital for co-operative societies. 14 Quality marking centres were established and in all 7.77 lakh yards of handloom cloth was quality marked. The 19 dye-houses started during Second Plan were also maintained. The sale of handloom cloth during the year at various depots aggregated to 11 lakh yards.

To give stimulus to the small scale industrialists a sum of Rs 17.11 lakhs was advanced as loan to 509 parties and Rs 0.14 lakhs were given as subsidy for electricity. Rs 0.05 lakh were also given to industrial co-operatives for strengthening of staff. A Small Industries Corporation was established at Jaipur to help the small units in getting raw materials, finance and other facilities. One quality marking centre for aluminium utensils at Jaipur was established and 27 common facility centres—12 for carpentry, blacksmithy and machine tools, 13 peri-patelle training cum demonstration units in foot wear and 2 for leather tanning were started. Construction on 14 Industrial Estates carried over from Second Plan was continued and preliminary work was initiated on 6 new Industrial Estates proposed at Dewar, Bundi, Churu.

Dungarpur, Sikar and Tonk By the end of 1961-62 in all 233 sheds were completed, 77 were nearing completion and 55 were at various stages of construction Of the completed sheds, 206 were allotted to the parties, out of which 77 went into operation and started production The work on 'Assisted Industrial Estates' at Falna and Rani was continued

Under the handi-crafts development scheme, 6 quality marking centres—4 at Jaipur and 1 each at Udaipur and Jodhpur and 12 design extension centres in Community Development blocks were opened

The Rajasthan Khadi and Village Industries Board, Jaipur continued to organise and promote khadi and village industries During the year under review 42.74 lakh yards of khadi valued at Rs 141.50 lakhs and village industry products valued at Rs 161.07 lakhs were produced The two Centrally Sponsored schemes viz, introduction of metric weights and measures and development of powerlooms also remained in progress

### Mineral Development

The mining activity in the State has registered a continuous growth during the past years and out of 45 minerals found in the State 30 are being exploited on commercial basis In the Third Five Year Plan, greater emphasis has been laid on mineral survey, prospecting and mining activities as well as promotion of mineral based industries in the State During the year 1961-62 under the scheme of intensive prospecting and reorganisation of the Department of Mines and Geology 166 posts to man the prospecting and mineral survey were sanctioned out of which 130 were technical and were mostly filled up by the end of the year In the field, 27 projects including reconnaissance, geological mapping and mineral investigation, detailed prospecting and drilling were taken up for different minerals in various parts of the State The investigations carried out particularly for fluorite, lignite, lime stone vermiculite and iron ore showed promising indications Besides, under the scheme of quarry improvement a sum of Rs 3.14 lakhs was spent during the year for purchase of various equipment and machinery which in turn were supplied on rent on 'no profit no loss' basis to quarrymen who are unable to procure them due to financial stringencies Loans amounting to Rs 0.44 lakh were also given to small scale mining lessees for taking up extraction of minerals on scientific lines

During the year a separate Lignite Mining Board was set up for the open cast lignite mining operations in Palana area and the Fluorite Project was taken up departmentally

Among non ferrous metals Rajasthan occupies a unique position specially in respect of lead and zinc minerals. It will also become one of the leading producers for copper ore in the country. There is a scheme of producing 21,000 tons of electrolytic copper per annum from the smelter to be established at Khetri. Likewise zinc smelter which is being installed at Udaipur would yield 18,000 tons of zinc per annum.

## V TRANSPORT & COMMUNICATIONS

### Roads and Transport

A well knit system of transport and communications is vital for the economic development. While the development of railways is the subject of the Central Government, the State Government has made appreciable efforts during the last two plans to develop the roads in the State and consequently the total road mileage in the State stood at 16744 at the end of the Second Plan which worked out to 12.69 miles per hundred sq miles of area. The Third Five Year Plan broadly aims to connect almost all villages with a population of 5000 and above by roads and also to connect all tehsil headquarters with their district headquarters by surfaced roads. An adequate road system will also be developed in the newly developing Bhakra, Chambal and Rajasthan Canal commanded areas.

During the year 1961-62, 358 miles of roads were to be constructed and 169 miles of existing roads were to be improved against which 351 miles of new roads were constructed and 171 miles of existing roads were improved as shown below —

Type of Road	Target		Achievement	
	Construction	Improvement	Construction	Improvement
1 Black topped	26	116	20	126
2 Metalled	230	63	239	45
3 Gravelled	102		92	
<b>TOTAL</b>	<b>358</b>	<b>169</b>	<b>351</b>	<b>171</b>

Out of the newly constructed roads, 310 miles were district roads, 28 miles approach roads to towns and villages, 6 miles approach roads to mines and quarries and 7 miles in Rajasthan Canal commanded area. Alongwith the new constructions, the existing roads were also improved.

as would be evident from the fact that the ratio of mileage under black topped roads has increased from 28 percent of total road mileage in 1960-61 to 31 percent in 1961-62 and the mileage under fair-weather roads has reduced from 32 percent to 28 percent during the same period as per details given in table 27

In view of the comparatively low rail haulage in Rajasthan, the road transport is the back bone of the communication system. There were 34893 motor vehicles at the end of 1961 in comparison to 32074 at the end of 1960 as per details given in table 28. The State Government has introduced nationalisation of road transport on a phased basis. By the end of the year 1961-62, 25 routes had been nationalised.

### Tourism

Rajasthan abounds in places of tourist interest. The Government is making all out efforts to develop them which has resulted in an increasing tourist traffic year by year. During the year 1961-62 construction work on low income group rest house at Mt. Abu was continued while the work on rest house at Ajmer and Pushkar and Sarai at Ajmer was completed. Improvements at Siliserh rest house and Dilaram garden at Amber were also effected. Under the scheme of improvement at Mt. Abu the work of bunding of sun rise valley and forming of a lake near Mohanpura village could not be started due to earlier monsoons. The improvements and increased facilities have attracted more and more foreign and home tourists in Rajasthan and their number had increased from 15 thousand and 10.50 lakhs in 1960 to about 20 thousand and 11.00 lakhs respectively in 1961.

## VI. SOCIAL SERVICES

### General Education and Cultural Programme

Purposive and well oriented education system is vital for bringing about technical progress and economic development in a country. As a result of the increase in educational facilities the percentage of literacy increased from 8.95 percent in 1951 to 15.21 percent in 1961. During Third Five Year Plan efforts will be directed towards quantitative expansion of educational institutions as well as qualitative improvement in the standards. Broadly, the percentage of school going children in the age groups of 6-11, 11-14 and 14-17 is expected to increase to 68.4, 24.0 and 11.3 percent respectively. Special attention shall also be paid for promoting university education. 10 New degree colleges will be opened and studies in new subjects will be introduced in the existing colleges.

To promote elementary education 3 pre-primary schools were started while financial assistance was provided to 6 private pre-primary schools. Further, under the scheme of introducing compulsory primary education, during the year, 2082 new primary schools were opened—1900 in panchayat samitis and 182 in urban areas. Special enrolment drive was launched with a view to attract more children to the schools, 1318 additional teachers and 25 sub deputy inspectors were appointed. The mid day-meal scheme was introduced in the districts of Dungarpur and Banswara and Pratapgarh tehsil (Chittorgarh district) which are mainly scheduled tribes areas. 297 Primary schools were raised to middle standard and 70 additional sections were started in the existing middle schools. 10 Middle schools were converted into senior basic schools.

For expanding secondary education during the year, 100 middle schools were upgraded to junior secondary schools, 9 high schools were converted into higher secondary schools and additional sections were started in 60 higher secondary schools. For promoting girls' education, 250 girls were given grant for books, 200 scholarships and 39 stipends were awarded. Two evening classes were also started. In the field of university education 10 new subjects were introduced in various colleges and 3 new colleges with 3 year's degree course were started at Dholpur, Dungarpur and Pali. 3 hobby work-shops were started at Ajmer, Bhilwara and Kishangarh.

During 1961-62 the Social Education Organisation was also strengthened by providing 5 additional posts of district social education officers. At the end of the year under review there were 3963 adult education centres functioning in the State. Under the scheme of National Cadet Corps 11 junior division army troops, 3 naval troops and 5 air-wing troops for boys and 2 senior divisions and 5 junior divisions for girls were established. Under the scheme of Sanskrit education staff was supplemented in 7 sanskrit pathshalas. The Rajasthan State Sports Council continued to promote sports and games in the State. For promotion of art and literature Rajasthan Sahitya Academy, Rajasthan Sangeet Natak Academy and Rajasthan Lalit-kala Academy were continued.

As a result of various development activities, it is estimated that by 31st March, 1962 the total number of recognised educational institutions in the State had gone up to 23479 from 20771 at the end of 1960-61. The percentage of school going children is estimated to be 47.5 in the

age group 6-11 years, 178 in age group 11-14 years and 74 in the age group 14-17 years

### Technical Education

This programme covers the field of engineering technology and craftsmen training, designed to help in building up the trained technical personnel required for schemes of industrial development, teaching and research. During the Third Plan it is proposed to open one regional engineering college at Jaipur and 2 polytechnics at Bharatpur and Jaipur. During the year 1961-62 both the engineering colleges at Jodhpur and Pilani and 5\* Polytechnics at Ajmer, Alwar, Jodhpur, Kota and Udaipur continued to function. In the final examination of 1961-62, in all 285 candidates appeared for the degree courses in Civil, Mechanical, Electrical and Mining engineering of which 269 candidates were declared successful. Likewise in diploma courses in Civil, Mechanical and Mining engineering 233 candidates appeared out of which 210 were declared successful.

### Modern Medicine

Expanding the scope and coverage of medical facilities is one of the basic objectives of democratic planning. Much has been done in this direction during the last decade. The Third Five Year Plan of the State further envisages to add 900 beds in various hospitals, 50 new dispensaries, 83 primary health centres, 5 dental clinics, 15 T B clinics, 190 family planning centres and 30 maternity and child welfare centres to the existing ones. Besides, it also provides for opening of one more medical college and expansion of various other training facilities. While malaria eradication programme is to be continued, the eradication of small pox and trachoma is to be started and the control measures against leprosy and venereal diseases are to be continued.

During the year 1961-62, 16 new dispensaries were opened and 172 beds were added in various hospitals. 4 primary health centres were started at Barmer, Bikaner, Khetri and Malkhera. The mobile surgical unit organised 10 camps during the year in different parts of the State where 1857 operations were conducted. One dental clinic was opened at Jhunjhunu. To assist people in planning the size of their families 29 family planning centres, 5 urban, 11 rural and 3 mobile units were opened. Anti malaria measures were continued through 17 malaria eradication units of which 6 were withdrawn by the end of the year.

---

\* Admissions in Polytechnic, Bikaner, to start from July 1963

11 B C G units continued to function and during the year 136 lakh persons were vaccinated against tuberculosis. For better implementation of plan schemes the administrative set up of the Department was further strengthened but the paucity of doctors and female candidates for the various training courses still persists.

#### Ayurved

The development of indigenous and homeopathic systems of medicine is warranted to cover the existing gap in the medical care facilities available in the State. During the Third Plan it is proposed to start 300 new dispensaries to upgrade 50 C class dispensaries and to open 5 Arogya kendras and 5 Yogic kendras.

During the year 1961-62 95 new dispensaries were opened of which 3 were located in Rajasthan Canal commanded area at Chorliyawali, Ganeh and Munda villages. 28 dispensary buildings were got constructed through panchayat samitis on 50 percent public participation basis. The Ayurvedic pharmacies at Ajmer and Udaipur continued to function and a new building for the storage of Ayurvedic raw herbs and manufacture of medicines was purchased. By the end of the year there were 17 hospitals with 220 beds in all and 1204 dispensaries in the State.

#### Urban and Rural Water Supply

During the Third Plan efforts will be made to provide at least one source of clean drinking water for every unit of 400 persons in the rural areas of the State. Under Urban Water Supply programme the broad objective is to cover all towns with a population of 10,000 or more. During the year 1961-62 under Rural Water Supply schemes 2 piped water supply schemes at Kishangarh Renwal and Molasar were completed while work was in progress at 58 other places. Urban Water Supply schemes at 8 places viz Bikaner Dausa Jalpur Karanpur Mandawa Sikar Todaraising and Udaipur were completed bringing the total schemes completed so far to 35 benefiting a population of about 16 lakhs. Besides these work on 54 other schemes remained under progress at the end of the year.

#### Housing

With the increase in the number of people and their mobility the housing problem has become acute both in urban and rural areas. To reduce the shortage of housing all schemes initiated during the Second Plan are to be continued during the Third Plan. During the year 1961-62 under Low Income Group Housing scheme loans to the extent

of Rs 29.67 lakhs were advanced to the individuals whose annual income does not exceed Rs 6000/-. The scheme was operating at all the 26 district headquarters of the State and 902 houses were constructed while 1555 remained under construction as shown in table 32. Subsidised Industrial Housing scheme was operating at Beawar, Bhilwara, Ganganagar, Jaipur, Jwar mines (Udaipur), Pali and Sawai Madhopur and in all 512 tenements were completed—452 single room and 60 double room, while 1042 tenements were under construction at the end of the year. Under Rural Housing scheme 50 more villages were covered during the year bringing the total coverage to 300 villages and out of Rs 18.45 lakhs reported as spent, Rs 17.81 lakhs were advanced as loans to the villagers for construction and renovation of houses. During the year 237 houses were completed and 2290 were under different stages of construction. This scheme was also in operation in Rajasthan Canal commanded area where 211 villagers were given loans for construction of new houses. Slum Clearance scheme was being implemented at Jaipur and Udaipur. During the year 1961-62 in all 80 tenements were completed while the work was in progress on 40 tenements.

Under the non plan scheme of Middle Income Group Housing, during the year 1961-62 Rs 29.97 lakhs were advanced as loans to the individuals whose annual income ranged between Rs 6000/- and Rs 16000/ and 209 houses were completed while the work was in progress on 243 houses at the end of the year under review as shown in table 32.

### **Welfare of Backward Class**

For the welfare of backward classes, welfare programmes were undertaken during the First and Second Plans and in light of the experience gained, a variety of development schemes have been undertaken during the Third Plan.

During the year under review, scholarships were distributed to 9383 students belonging to scheduled tribes, 8 rented hostels were newly established and the 4 Ashram schools opened during the Second Plan were continued. For the economic uplift of scheduled tribes aid to 44 families for cottage industries and to 294 families for purchase of agricultural implements was given. 188 families were also rehabilitated. Construction work on 114 tanks and bunds was in progress while 648 irrigation wells were sunk during the year. Besides these, 217 drinking water wells were also sunk.

Under the schemes taken up for the welfare of scheduled castes 5651 students were awarded scholarships for continuing their studies, 13 rented hostels were established for accommodating the students of scheduled castes and subsidy was given to 14 persons for taking up cottage industries, to 56 persons for construction of houses, to 150 persons for purchase of agricultural implements and to 25 persons for sinking drinking water wells

For the uplift of nomadic tribes scholarships were awarded to 377 students and aid was given to one voluntary agency to run educational institutions for them

Besides the above certain schemes were also being implemented as Centrally Sponsored ones for the welfare of scheduled tribes, scheduled castes and denotified tribes. In all a sum of Rs 17.18 lakhs were allotted for the year for these schemes against which Rs 7.44 lakhs were spent

### Social Welfare

The Social Welfare programme includes the schemes of welfare extension projects social and moral hygiene and after care programmes. These schemes are meant for those sections of the community which need special care and protection. During the year under review one home for aged and infirm was established at Kota which had 7 inmates at the end of the year. For the benefit of physically and mentally handicapped persons one school for blind students at Bikaner was started while the work was initiated for starting a school at Jodhpur for deaf and dumb. The schemes of social and moral hygiene and after-care were given special emphasis. 3 Rescue homes opened during the Second Plan were continued and admissions were given to girls rescued from moral danger, fallen women, deserted wives, despoised widows and unmarried mothers. A remand home was started at Udaipur to take care of children, who are awaiting trial before court, delinquent children needing protection and neglected and uncared children. 33 Social welfare extension projects of the Second Plan were continued and on an average 507 children were benefited daily through the Bal-balies, 267 persons learnt crafts, 347 persons were made literate and 652 persons were benefited through cultural activities.

### Labour and Labour Welfare

For the welfare of labour and expansion of employment services during the Third Plan it is proposed to open 5 recreation centres, 1 workers holiday home, 8 employment exchanges, 1 university

employment bureau, 26 employment information and assistance bureaux, 11 new industrial training institutes etc. During 1961-62 the 25 labour welfare centres started by the end of Second Plan were continued and 2 recreation centres—one at Bharatpur and the other at Morak were newly opened. By the end of the year there were 18 employment exchanges in the State and 6 crafts men training centres were functioning at Ajmer, Bikaner, Jaipur, Jodhpur, Kota and Udaipur.

The Employees' State Insurance scheme was extended during the year to all centres where there is concentration of 500 or more industrial workers and since 15th July, 1962 specialist facilities were also made available to the families of insured persons. In all, by the end of 1961-62, 151 factories were covered under the scheme giving benefit to 34772 insured workers and the members of their families which are estimated to be over a lakh.

#### Public Co-operation

Public co-operation has been recognised as the principal force essential for the success of our plans. During the year under review four schemes viz. (i) Lok Karya Kshetra, (ii) Research and Training (Pilot Project), (iii) Planning forums and (iv) Construction schemes were taken up. The All India Association for Moral and Social Hygiene Rajasthan branch, Jaipur took up implementation of the Immoral Traffic (persons) Act. The planning forums were organised in 21 colleges located at different places in the State. The Bharat Sevak Samaj has chalked out a scheme for the establishment of 2 slum clearance centres in Jaipur city which was under consideration of the Government at the end of the year under review. The Samaj has also undertaken the earth work at Chambal Project.

### VII MISCELLANEOUS

#### Statistics

In view of the increasing importance of statistics as a prerequisite of planning and a tool for assessing and evaluating the impact of various plan schemes, special emphasis has been laid in the Third Five Year Plan to strengthen the Directorate of Economics and Statistics and to conduct Economic and Industrial Survey of the State.

During the year 1961-62, 5 District Statistical Agencies were newly set up at Alwar, Bhilwara, Jaipur, Pali and Sawai Madhopur. The

Directorate continued to advise other Administrative Departments in the matter of collection and maintenance of plan statistics and to collect periodic information regarding progress of plan activities for its publication in the regular monthly quarterly and annual plan progress reports. Various Index Numbers were prepared and Census of Government Employees' and Annual Survey of Industries were conducted. National Income estimates for the State for the year 1954-55 to 1959-60 were released while the estimates for 1960-61 were under finalisation. During the year the Directorate conducted three *ad hoc* surveys to study (i) the difficulties of students in getting admissions in technical colleges, (ii) the future careers which the students choose after passing their graduation and post graduation examinations and (iii) the affects of octroi and sales tax on small scale industries. The pilot enquiry with regard to employment and unemployment in rural areas was conducted in Ajmer, Kota and Udaipur districts. Under NSS programme, 17th round of socio economic surveys was under taken and sample survey of improved agricultural practices for both Rabi and Kharif crops was initiated. During the year besides the regular publications, 2 new publications viz (i) A Decade of Planned Economy both in English and Hindi and (ii) Industrial Structure of Rajasthan 1958 were brought out. District folders for all the 26 districts were also published.

During the year under review the Directorate of Economic and Industrial Surveys also completed Economic survey of 4 districts viz, Bharatpur, Chittorgarh, Churu and Sikar and Industrial survey of 6 districts viz, Ajmer, Banswara, Bhilwara, Dungarpur, Sirohi and Udaipur.

#### Information and Publicity

A comprehensive programme to make people aware of the benefits likely to accrue to them from the various schemes of economic and social development and to make them conscious of their duties and responsibilities towards this national endeavour is vital to the success of the plan. The Third Plan besides intensifying the activities taken up during Second Plan provides for opening of 6 urban publicity units 6 departmental publicity units and 21 district information centres. It is also proposed to establish a documentary film production unit for preparing films, 3 mobile exhibition units, to organise a research and reference wing and to bring out various publications. During the year 1961-62 an Urban Information Centre was established at Ajmer. Three documentary films on Panchayati Raj in Rajasthan were prepared and put up for show. Four folders and 8 leaflets depicting the progress under the plan were

distributed among the general public. Other programmes could not make much head-way as the schemes started functioning late during the year because of administrative difficulties.

### Local Bodies (Urban Community Development)

Under this programme during the year 1961-62 it was aimed to cover 10 percent of the total urban population but due to certain difficulties the scheme was kept in abeyance.

### Mandis

The development of Mandis in the newly developing areas commanded by Bhakra, Chambal and Rajasthan Canal projects has been given due emphasis and it has been envisaged that during the Third Plan period 21 mandis in Bhakra area, 5 in Chambal area and 3 in Rajasthan Canal commanded area will be developed. During the year 1961-62, work on 'A' class mandi at Hanumangarh and 6 'B' class mandis at Bhadra, Nohar, Pilibangan, Sadulshahar, Singaria and Suratgarh in Bhakra area was continued, 12 miles of roads were completed, 20 miles of roads were under construction, 30 buildings were at various stages of construction and one residential building for the staff of the Public Works Department was completed. In Chambal area work of lay-out and construction of roads, street lighting, water supply and stores was in progress at Baran, Bundi and Kota mandis. Besides, land acquisition proceedings were also in progress. In Rajasthan Canal commanded area the works relating to levelling and construction of link road at Anupgarh colony from Railway station to town and development of Rawatsar mandi were undertaken during the year under review.

### DEVELOPMENT OF RAJASTHAN CANAL COMMANDED AREA

Specific attention is being paid towards the development of the newly coming up colonies in the Rajasthan Canal commanded area. In the field of agriculture, during the year, loans amounting to Rs 1.89 lakhs were advanced to agriculturists for purchase of tractors and other land levelling equipments for developing land and 10 demonstrations were held for promoting improved agricultural practices, chemical fertilizers were distributed and about 28 thousand acres of land was covered under crop protection measures. A mobile veterinary dispensary was established with its headquarters at Rawatsar and a cattle show was also arranged there. 10 labour co-operative societies and 10 co-operative farming societies were organised and given financial assistance. A forest nursery was also established in Masitanwall in Naurangdesar area.

Under Power sector construction of 28 mile long Hanumangarh-Rawatsar transmission line was in progress. Construction work was also in progress on (i) Suratgarh-Bhinwal, (ii) Nohar-Rawatsar-Pilibangan-Lakuwali, (iii) Raisinghnagar-Anupgarh, (iv) Chittorgarh-Anupgarh and (v) Ramsinghpur-Kunpli road links in this area. In the field of education, 9 primary schools were opened during the year at Bhompura, Burhanpur, Dasuwah, Daulat Abad-ki-Dhani, Kanor, Kesharwala, Ludhana, Nihalpura and Rangmal villages where villagers themselves have arranged for necessary building accommodation. To provide increased medical facilities tenders have been called for the proposed mobile dispensary van and for a 25 bedded hospital at Suratgarh which shall eventually have 50 beds. The Site for a primary health centre has been selected at Rawatsar, 3 Ayurvedic dispensaries were opened at Choriya-wali, Ganeli and Munda villages. Construction work of 4 diggis (for drinking water) which was a spill over from Second Plan was completed and work was in progress on another 6 diggis. Under the scheme of Rural Housing a sum of Rs 1.37 lakhs was distributed to 211 parties for construction of houses. Besides, for developing mandis in this area works relating to levelling and construction of link road at Anupgarh Colony from Railway station to town and development of Rawatsar Mandi were also undertaken during the year under review.

## CENTRALLY SPONSORED SCHEMES\*

1961-62

(Rs. in lakhs)

Head of Development		Outlay	Expenditure
1		2	3
1	Soil conservation		
	(i) Soil conservation in river valley projects Chambal catchment	1.16	0.94
	(ii) Survey of Ravine land	0.20	0.17
	(iii) Dry farming demonstrations	0.60	0.29
2	Community development		
	(i) Local development programme	23.50	21.91
	(ii) Pilot project for utilisation of rural man power	2.00	2.00
3	Industries		
	(i) Introduction of weights & measures	6.40	2.21
	(ii) Conversion of hand looms into power looms	13.92	0.02
4	Roads		
	Roads of economic & inter State importance	6.05	6.09
5	Education		
	(i) Construction of hostels	N.A.	1.13
	(ii) Implementation of the scheme of Revised salary	N.A.	0.38
6	Ayurved		
	(a) Indigenous and other systems of medicine—assistance for research schemes	1.20	0.18
7	Welfare of backward classes & social welfare		
	(i) Welfare of scheduled tribes		
	(a) Education		..
	(b) Economic uplift		2.65
	(c) Health housing & other schemes		0.24
	(ii) Welfare of scheduled castes—health housing and other schemes	15.35	3.69
	(iii) Welfare of denotified tribes		
	(a) Education		0.52
	(b) Health housing & other schemes		0.34
8	Mandis		
	(i) Land acquisition and development	6.00	6.00
Total		96.85	43.76

\*Schemes fully financed by the Central Government
